

DUAL PRICING | EDGE- CHOOSE THE BEST % FOR YOU!

EDGE IS A WINNING SOLUTION FOR YOUR MERCHANTS.

EDGE enables the merchant to set the retail price at an itemized level for each item.

No matter if they are paying by card or paying by cash.

This is similar to how gas stations have two prices for gas depending on payment method.

All items have two prices.
Never a fee!

WHAT IS DUAL PRICING?

With our Dual Pricing program, you can enable your merchants to literally keep the same amount of money for a non-cash payment as they do for a cash payment. This allows merchants to profit the same no matter how a customer pays. This program greatly increases your profitability.

THE EDGE ADVANTAGE

Merchants are now using our edge dual price program to help their business's grow by using the proceeds from their dual price program to invest in marketing and hiring.

This easy to use program is the same as using any credit card terminal or POS system with an automatic % applied when a card is used instead of cash when a customer makes payment in your store or restaurant.
